## EDUCATION

04.2018 - 2022

**Federal University of Agriculture, Abeokuta, Ogun State, Nigeria.**  
Computer Science

## EXPERIENCE

11.2019 - 09.2020

**SmartTeller Digital Banking Platform**

Data Engineer

Responsibilities: cleaning heavy data with python technology; entering thousands of data into the company system with selenium(python) within 2 hours. This could have taken 3 - 4 men three to four months to complete if done traditionally.

10.2020 - 2022

**SmartTeller Digital Banking Platform**

Fullstack Developer

I created web applications and integrated APIs into existing user interfaces while also heavily refurbishing and refactoring the smartteller codebase with php, html, css, bootstrap, and javascript.

05.2021 - 01.2022

**Ai+ Federal University of Agriculture Abeokuta Chapter.**

Python, Data Science And Machine Learning Mentor.

I oversaw the mentoring of ten mentees in the Ai+ Federal University of Agriculture Abeokuta Community mentorship program.

02.2022 - 04.2022

**Coin Merchant**

Backend Engineer

I was responsible for building the APIs for the mobile application integration of Coinmerchant. I was also responsible for designing the administrative dashboard and also building the backend for the administrative dashboard.

07.2022 - 07.2022

**Eviafrica**

Fullstack engineer

I developed a financial MVP for Eviafrica using ReactJS for the frontend and PHP OOP for the backend.

## SKILLS

Good communication - written and oral skills

Excellent conceptual and analytical skills

Effective interpersonal skills

## SOFTWARE SKILLS

Python - To automate tasks and build web applications

Django - Python web framework for business logic development

PHP - A backend scripting language

HTML & CSS - frontend technology for building websites.

Javascript - to build interactive web applications.

React js - Javascript library for creating complex user interfaces
